MERN Stack Development

Kunal Kumbhar

Full Stack Developer (MERN) | React Developer | Node.js Backend Developer | Building Scalable Web Applications
Pune, Maharashtra, India

Summary

Hi, I'm Kunal — a Full Stack Developer specializing in the MERN stack, with strong hands-on experience across frontend, backend, and scalable web systems.

I design, build, and maintain production-grade web applications using React, Node.js, Express, and MongoDB. I've worked on real-world products including SaaS platforms, food delivery systems, admin dashboards, and role-based applications used by live users.

Frontend (React / UI)

- # Build clean, responsive, and high-performance user interfaces using React, TypeScript, Tailwind CSS, shadcn/ui, and modern UI libraries
- # Develop reusable components, implement state management with Redux, and deliver smooth user experiences
- # Focus on performance optimization, accessibility, and maintainable UI architecture

Backend (Node.js / APIs)

- # Develop scalable REST APIs using Node.js and Express
- # Design secure backend systems with JWT authentication, role-based access control (RBAC), and strong input validation
- # Work with MongoDB, Redis, and optimized database queries for performance and scalability
- # Integrate third-party services such as Stripe payments, OAuth (GitHub/Google), webhooks, and background jobs

Professional Highlights

- # Built and deployed multiple production applications end-to-end
- # Developed SaaS platforms with subscriptions, real-time updates, and background processing
- # Led code reviews, collaborated with cross-functional teams, and followed engineering best practices

Hands-on experience with Docker, Git, CI-friendly workflows, and modern deployment setups

Tech Stack

React · TypeScript · JavaScript (ES6+) · Node.js · Express · MongoDB · Redis · Tailwind CSS · shadcn/ui · Redux · REST APIs · JWT · RBAC · Docker · Git · GitHub · Firebase · Supabase · Stripe · Webhooks

I'm open to Full Stack Developer, React Developer (Frontend), and Node.js Developer (Backend) roles where I can contribute to impactful products and continue growing as an engineer.

Let's connect if you're hiring or building something meaningful.

Experience

napps

1 year 6 months

Programmer Analyst

November 2025 - Present (3 months)

- Developing and maintaining production-grade MERN stack applications with focus on scalability and performance
- Building React-based dashboards and user-facing interfaces
- Designing and implementing REST APIs using Node.js and Express
- Optimizing MongoDB queries and backend logic for efficiency
- Integrating third-party APIs, authentication, and payment systems
- Conducting code reviews and mentoring intern developers

Programmer Analyst Trainee

November 2024 - October 2025 (1 year)

- Built and delivered a live food delivery application with order tracking and payment integration
- Developed admin dashboards for restaurant management and analytics
- Implemented responsive UI using Tailwind CSS
- Worked closely with backend APIs, database schemas, and deployment processes

Full Stack Developer Intern

August 2024 - October 2024 (3 months)

- Built responsive web applications using React, Node.js, Express, and MongoDB
- Assisted in API development, database design, and application deployment
- Collaborated with senior developers to implement real-world features

Vocabulix- Design & IT Solutions

Web Developer

March 2023 - April 2023 (2 months)

Pune, Maharashtra, India

- Built dynamic and responsive web interfaces using HTML, CSS, and JavaScript
- Improved UI/UX across client projects, increasing engagement and reducing user complaints

Education

Sinhgad College of Engineering

Bachelor of Engineering - BE · (June 2021 - April 2024)

Pimpri Chinchwad Education Trust'S. Pimpri Chinchwad College Of Engineering

Diploma of Education · (July 2019 - May 2021)

Jawahar Navodaya Vidyalaya (JNV)

· (July 2012 - May 2018)
